This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

High Income (the "Sub-Fund") is a sub-fund of ATRIUM PORTFOLIO SICAV (the "Fund") Class A USD (the "Class") - ISIN: LU2029716953

The Fund has appointed FundPartner Solutions (Europe) S.A. as management company.

Objectives and investment policy

The Sub-Fund's objective is an annual return equal to money market rates plus 3% with a volatility of up to 10%, over the short and medium-term. The Sub-Fund will mainly invest in worldwide debt securities (including money market instruments) of any type, issued by corporate or sovereign issuers.

The Sub-Fund is actively managed. The index 1 Month Libor +3% is only used for the calculation of the performance fee (payable to the investment manager). The Sub-Fund does not intend to use the index for performance comparison nor to track it. Due to the specificity of the index, the degree of freedom is not relevant in this context.

The Sub-Fund can be exposed to investment grade and non-investment grade debt securities. Even if it is the intention of the investment manager to have a focus on investment grade debt securities or issuers, depending on financial market conditions and investment opportunities, non-investment grade debt securities can represent the major part of the portfolio.

The choice of investments will neither be limited by geographical area (including emerging markets), nor in terms of economic sector. However, depending on financial market conditions, a particular focus can be placed in a single country (or some countries) and/or in a single economic sector. The Sub-Fund may invest up to 100% of its net assets in emerging markets.

For hedging purposes and for any other purposes, the Sub-Fund may use all type of financial derivative instruments traded on a regulated market and/or over-the-counter.

The Sub-Fund may invest up to a maximum of 49% of its net assets in other eligible assets, such as equities, structured products (other than convertible bonds), cash and undertakings for collective investment (UCIs). The Sub-Fund will not invest more than 10% of its net assets in units or shares of UCIs.

The Sub-Fund will be normally fully invested, however if the investment manager considers this to be in the best interest of the shareholders, the

Sub-Fund may also hold up to 100% of its net assets in cash and cash equivalents (money market UCIs (within the above-mentioned 10% limit) and money market instruments).

Why is this Sub-Fund in this category?

The portfolio of this Sub-Fund consists mainly of debt securities of any type, issued by corporate or sovereign worldwide issuers. The Sub-Fund can be exposed to investment grade and non-investment grade debt securities. Hence, the risk/reward profile of the Sub-Fund should correspond to the Medium Low risk category of on the SRRI scale.

Are there any other particular Risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward rating include:

• **Liquidity risks:** The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.

• **Counterparty risks:** The Sub-Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.

• **Credit risks:** The Sub-Fund invests a significant part of its investments in debt securities. The issuers of these debt securities may become insolvent, which will mean that the securities will lose all or some of their value.

• **Risks from the use of derivatives:** The Sub-Fund may use financial derivatives instruments which may result in the Sub-Fund being leveraged and may result in material fluctuations in the value of the Sub-Fund. Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Sub-Fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Sub-Fund being exposed to a greater loss than the initial investment.

• **Operational risks:** The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the management company or by external third parties or may be damaged by external events, such as natural disasters.
