Management report

Global Financial Market Overview

2020 was an authentic roller-coaster ride for capital markets and global economies, as the COVID-19 virus spread all over the globe threatening the public health of countries, and forcing them to impose strict lockdowns, that halted economic activity worldwide. Markets reacted hastily as restrictions unraveled, with equities recording the fastest drop in history, credit spreads widened, and government bond yields declined. State governments and central banks were quick to react, as liquidity froze, the unison cry for help of markets and the economy, was met with unprecedented measures to support businesses and households. In the second semester, early signs of recovery started to show, as lockdown restrictions eased and forwardlooking markets, boosted by huge stimulus programs and accommodative monetary policies, answered massive selloffs in kind, recovering the losses brought by the pandemic. Economic recovery continued through the last quarter, as equity markets reached record highs and interest rates rose on optimistic news of successful vaccine trials and distribution plans. The U.S. elections, that would have, in any other year, taken center stage as a driving factor of market reactions, had but ripple implications in a sea storm of movements, as Joe Biden beat incumbent President Donald Trump in the race to the White House and Democrats clung majority in the Senate. Towards year-end, the number of COVID-19 cases continued to soar, and some countries were forced to revisit lockdown restrictions and boost investor and consumer confidence with new fiscal and monetary packages, allowing for equity markets to close the year on record highs. In a year where distancing behaviors reigned imperative, the UK officially left the EU. The culmination of several rounds of negotiations instantiated by the results of the referendum back in 2016.

The lockdown measures enforced by governments worldwide in an effort to stop the spreading of the pandemic plunged economic activity into the worst recession since World War II. The U.S. economy shrank 9.5% sequentially in the second quarter, whilst the EU experienced a decrease of 11.4% in the same period. A recovery period ensued in the second semester of the year, with the ease of restrictions. Output jumped 12.1% in the EU relative to the previous quarter, the sharpest increase ever recorded in the union, and the U.S. climbed 33.4% on an annually adjusted basis. Despite the positive signs of economic activity, the labor market recovery lagged, as unemployment levels topped at a rate of 14.7% in April and were still at 6.7% by year-end in the US. China leads economic recovery from a worldwide perspective, and it is forecasted to be the only country with positive annual growth in output (+1.85%) according to the IMF in a report released in October.

As previously stated, the policy response to this crisis was swift and decisive, both in the fiscal and monetary spaces. Economic-stimulus responses were estimated at 10 trillion dollars in just two months, and for some countries, this response represented a ten-fold increase as a percentage of GDP to that deployed during the 2008-09 financial crisis. In the US, the FED lowered the federal fund rates by 150 bp to 0-0.25 bps, ensuring rates will remain low until inflation targets and maximum employment are reached. It also expanded overnight and short-term repos, lowered the lending cost, reduced existing cost of swap lines with major central banks and extended the maturity of FX operations, broadened U.S. dollar swap lines to more central banks and offered temporary repo facility for foreign and international monetary authorities and announced support to buy corporate bonds in both the primary and secondary markets. In Europe and across the globe, similar policies were undertaken, such as the 1.35 trillion-euro PEPP announced by the ECB in flexible asset purchases, that quickly addressed the issue of illiquidity and reassured investors, as spreads relative to German Bunds fell.

Management report (continued)

Equities finished the year strong after an impressive rally following the selloff in March. The MSCI World Index in local currency was up 11.7%, after registering an impressive recovery from the maximum drawdown of 30% year-to-date. The S&P 500 capped off the year in a record high after gaining 16.3% relative to the start of the year, where tech-intensive stocks boosted growth, with the Nasdaq 100 Index appreciating 43.64% in the year. The euro area markets underperformed relative to their American counterparts, with the Euro Stoxx 50 Index down 5.1% and the FTSE 100 down 14.3% at year's end. Although the market's recovery was astounding, it did not portray a real depiction of the state of the real economy. Forward-looking markets are likely looking beyond a tough start to 2021 and discounting cash flows under the expectation of a successful global vaccination effort and maintained economic stimulus.

Global rates declined in the first quarter of the year as investors sought refuge in those assets. Since then, yields increased slightly on higher inflation expectations after the news of successful vaccine trials and increased optimism. Still, the 10-year U.S. Treasury was down 100.3 bps at 0.92% and the German bund with the same maturity was down 38.4 bps at -0.57%, both at year's end. Strong risk appetite drove credit spreads tighter in the last quarter of the year, after widening aggressively in the awake of the pandemic. In the US, the Bloomberg Barclays U.S. Aggregate Bond Index was up 7.51% in dollars year-to-date, with high-yield bonds outperforming in the last quarter of the year, as measured by the Bloomberg Barclays U.S. Corporate High Yield Index returning 6.45%.

In the commodities space, the Bloomberg commodity index closed the year down 3.12%, in spite of surging gold prices that broke the 2,000-dollar mark for the first time ever in August, after inflationary concerns over excessive money-printing by central banks. After several rounds of negotiations to adjust production levels, crude oil prices recovered from historical price move into negative territory in April, to levels showcased in the beginning of the year. The energy sub-index fell 42.7%.

Finally, in the foreign-exchange universe, the highlight was the severe depreciation of the US dollar relative to its peers, after raising concerns over rock-bottom interest rate levels and that continued economic relief packages could expose the fragility of ever inflating fiscal deficits. The Dollar index, a measure of the value of USD against a main basket of currencies, was down 6.7% year-to-date and the Euro-Dollar was up 8.9%, breaking the barrier of 1.20 and closing the year at 1.222.

Sub-fund ATRIUM PORTFOLIO SICAV - QUADRANT

Atrium Portfolio Sicav - Quadrant EUR returned 1.2% in 2020.

The sub-fund was negatively impacted in the awake of the pandemic. However, it benefited from the tightening of credit spreads that took place in the second half of the year, as economies began reopening.

Equity exposure boosted the recovery of the sub-fund during the second semester, as markets reacted positively to optimistic news and stimulus assurances, mainly in the last quarter of the year.

Commodities recovered from the poor performance of earlier months to deliver a close to null contribution to the sub-fund at year's end.

Management report (continued)

Sub-fund ATRIUM PORTFOLIO SICAV - SEXTANT

Atrium Portfolio Sicav - Sextant EUR returned -3.1% in 2020.

The exposure to equity was the main deterrent of the sub-fund's performance, with European stocks registering the worst geographical contribution. The value bias and the regional underweight of the equity portfolio in the US were the negative highlights.

On the fixed income front, the asset class boosted the sub-fund's returns, mainly stemming from its long exposure in US treasuries, in the first quarter of the year, having more than offset losses on the short Bund positions by year's end. The sub-fund also benefited from the tightening of credit spreads following the initial breakout of the pandemic, mainly in the investment grade universe.

The investment in commodities delivered a close to null contribution to the sub-fund's performance, after lagging considerably in the first quarter of the year.

Sub-fund ATRIUM PORTFOLIO SICAV - OCTANT

Atrium Portfolio Sicav - Octant EUR returned 3.8% in 2020.

The sub-fund was able to recover from the biggest drawdowns during the earlier months of January through April, and close the year with positive returns. Having benefited from the outstanding rally of equities that took place in the second semester, the exposure to the U.S. region was the main contributor to the improvement in performance, whilst their European counterparts were its main deterrent, both of them including a value bias in the portfolio. Emerging markets and Asian equities also had a positive contribution, albeit more moderately.

Sub-fund ATRIUM PORTFOLIO SICAV - GLOBAL SELECTION

Atrium Portfolio Sicav - Global Selection EUR returned -0.3% in 2020.

The portfolio was impacted by the overweight in European companies, namely the ones most affected with the COVID-19 lockdowns, such as the beverages, retail and insurance sectors. The US Dollar currency impact also had a relevant impact on the annual performance, having a negative contribution of 4.5%.

In terms of positioning, the sub-fund maintained significantly differences to the MSCI World Index at a sector level, having with no exposure to utilities, real estate and materials. On a geographical level, the largest exposure of the sub-fund is the United States, although lower than the benchmark, and Europe is the highest relative exposure of the current strategy. The sub-fund remained with no direct exposure to Emerging Markets.

The sub-fund sold 8 companies and bought 7 companies throughout 2020, ending the year with 38 holdings and with an equity exposure of 99%. The remaining of the portfolio was allocated to cash.

Management report (continued)

Sub-fund ATRIUM PORTFOLIO SICAV - GRADIENT

Atrium Portfolio Sicav - Gradient EUR returned 0.3% in 2020.

After being negatively impacted by the aggressive widening in credit spreads that occurred in March, across geographies and bond segments, the sub-fund was able to capitalize on its mostly unchanged exposure to investment grade bonds and primary market deals at attractive new issue premiums, to top the year off with a slight positive return.

Given the global low interest rate environment, the challenge was to find the right balance between issuers with high capital buffers to withstand significant stress, with high yield names less vulnerable to interest rate moves.

Sub-fund ATRIUM PORTFOLIO SICAV - HIGH INCOME

Atrium Portfolio Sicav - High Income EUR returned 3.9% in 2020.

Similarly, to the credit exposures in other portfolios, the sub-fund was negatively impacted by the aggressively widening in credit spreads that occurred in March. At semester end, the sub-fund's exposure to riskier assets increased, in order to capture the benefits of a possible reconvergence of spreads.

The positioning of the portfolio was proven adequate, as it was able to capitalize on the tightening of spreads in the Subordinated, High Yield and Emerging Market debt spaces, closing the year with a considerable positive return, after a remarkable recovery.

Sub-fund ATRIUM PORTFOLIO SICAV - GLOBAL BALANCED

Atrium Portfolio Sicav - Global Balanced returned +1.10% since November of 2020, the inception month of the fund. During this period, the sub-fund invested in a broad spectrum of asset classes, and the core portfolio allocation remained mostly unchanged during the 2-month period. The portfolio was positively impacted by the surge in equity markets, towards year-end, with U.S. stocks returning the best geographical performance. The fund closed the year with an equity exposure of 47.8%. With regards to the fixed income segment, contributions were also positive in the period considered, albeit at a much smaller scale.

Management report (continued)

Outlook

Going forward, unpredictability is still a major concern for markets, its participants and the real economy, as the number of new infection cases and hospitalizations surged, yet again, at the end of the year, forcing a new round of lockdowns and restrictions. New variants of the virus have also been discovered and are believed to hold properties that make them more contagious, and hence, a bigger threat to the global economy. On the other hand, vaccine rollouts are well underway in many countries and regions including the US, Canada, UK, EU and Russia. Central banks and governments have made the commitment to maintain low interest rates and continue with necessary fiscal stimulus, which prompts a positive outlook, reflected on the recent performance of equities. However, high debt levels and the timing of withdrawal of some exceptional support measures can be perceived as additional risk factors for the coming year. If sustained, the IMF projects that the global economic recovery could result in a global GDP growth rate of over 5%, which would be the fastest in over 40 years.

Audit report

To the Shareholders of ATRIUM PORTFOLIO SICAV

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of ATRIUM PORTFOLIO SICAV (the "Fund") and of each of its sub-funds as at 31 December 2020, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the statement of net assets as at 31 December 2020;
- the statement of operations and changes in net assets for the year then ended;
- the statement of investments and other net assets as at 31 December 2020; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
 a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
 involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
 control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

NOTE 1 GENERAL

ATRIUM PORTFOLIO SICAV (the "Company") is an open-ended investment company of the umbrella type organised as a "*société anonyme*" under the laws of the Grand Duchy of Luxembourg and qualifies as a *Société d'Investissement à Capital Variable* ("SICAV") subject to the provisions of Part I of the Luxembourg law dated December 17, 2010 relating to undertakings for collective investment, as amended (the "2010 Law"), transposing the provisions of the EU Directive 2009/65/CE of July 13, 2009.

The Company was formerly incorporated as "Quadrant Fund SPC", an exempted segregated portfolio company limited by shares under Cayman law on March 14, 2011 and redomiciled to Luxembourg for an indefinite period on September 22, 2011 as the limited liability company (*société anonyme*) ATRIUM SICAV, renamed ATRIUM PORTFOLIO SICAV by the extraordinary general meeting of November 9, 2011. The Company's minimum capital is EUR 1,250,000.00. The Company is registered at the Trade and Companies Register of Luxembourg under a number pending issue.

FundPartner Solutions (Europe) S.A. with registered office at 15, avenue J.F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg was appointed Management Company of the Company as of December 30, 2013. It is a Management Company within the meaning of Chapter 15 of the 2010 Law.

a) Sub-funds in activity

As at December 31, 2020, the Company comprises seven sub-funds:

- ATRIUM PORTFOLIO SICAV QUADRANT, denominated in euro (EUR),
- ATRIUM PORTFOLIO SICAV SEXTANT, denominated in euro (EUR),
- ATRIUM PORTFOLIO SICAV OCTANT, denominated in euro (EUR),
- ATRIUM PORTFOLIO SICAV GRADIENT, denominated in euro (EUR),
- ATRIUM PORTFOLIO SICAV HIGH INCOME, denominated in US dollar (USD),
- ATRIUM PORTFOLIO SICAV GLOBAL SELECTION, denominated in euro (EUR),
- ATRIUM PORTFOLIO SICAV GLOBAL BALANCED (launched on November 13, 2020, denominated in euro (EUR).

The Company is allowed to issue, for each sub-fund, share classes denominated in currencies other than the sub-fund's base currency. Such share classes can be hedged against exchange rates fluctuations (as defined below).

b) Significant events and material changes

A new prospectus came into force on October 2020.

As at November 13, 2020, the Board of Directors of the Company has decided to launch a new sub-fund ATRIUM PORTFOLIO SICAV - GLOBAL BALANCED.

Notes to the financial statements as at December 31, 2020 (continued)

c) Share classes

Hedged shares seek to hedge most of the exchange-rate risk of these shares against a given currency. Shareholders of hedged share classes should note that returns of hedged share classes may be significantly different over time than those of unhedged classes. The costs of currency-hedging and gains/losses from hedging transactions are borne by the relevant hedged share class.

As at December 31, 2020, the Company comprises the following hedged shares:

- ATRIUM PORTFOLIO SICAV QUADRANT A USD,
- ATRIUM PORTFOLIO SICAV SEXTANT A USD,
- ATRIUM PORTFOLIO SICAV OCTANT A USD,
- ATRIUM PORTFOLIO SICAV GRADIENT A USD,
- ATRIUM PORTFOLIO SICAV HIGH INCOME A EUR,
- ATRIUM PORTFOLIO SICAV GLOBAL SELECTION A USD,
- ATRIUM PORTFOLIO SICAV GLOBAL BALANCED A USD.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES

a) General

The financial statements are presented in accordance with the legal reporting requirements and generally accepted accounting principles in Luxembourg.

The Company's total net assets are expressed in euro and correspond to the difference between the total assets and the total liabilities of the Company.

b) Valuation of investments

a) The securities listed on a stock exchange or another regulated market are valued at the last known price unless that price is not representative.

b) Securities not admitted to such stock exchange or on such a regulated market as well as securities that are so admitted but for which the final price is not representative, are valued based on the probable realization value estimated prudently and in good faith.

c) The value of the liquid asset, bills or notes payable on demand and accounts receivable, prepaid expenditures, dividends and interest announced or come to maturity not yet affected, is constituted by the nominal value of these assets, except if it is unlikely that this value could be obtained. In the latter case, the value is determined by subtracting a certain amount that the Board of Directors of the Company deems appropriate to reflect the real value of these assets.

d) Money market instruments are valued at their nominal value plus any eventually accrued interest or at "marked-to-market". Transferable securities with a residual valued of less than 397 days or transferable securities with a yield that is regularly adapted (at least every 397 days), are evaluated with the amortized cost method.

e) Assets expressed in a currency other than the currency of the corresponding sub-fund are converted in this sub-fund's reference currency at the applicable exchange rate.

Notes to the financial statements as at December 31, 2020 (continued)

f) In determining the value of the assets of the Company shares in open-ended underlying funds are valued at the actual net asset value for such shares or units as of the relevant Valuation Day. If events have occurred which may have resulted in a material change in the net asset value of such shares or units since the date on which such net asset value was calculated, the value of such shares or units may be adjusted in order to prudently reflect the probable sale price in the reasonable opinion of the Board of Directors of the Company, but the Board of Directors of the Company is not be required to revise or recalculate the net asset value on the basis of which subscriptions, redemptions or conversions may have been previously accepted.

g) Futures and forward contracts that are not traded on a regulated market or a stock exchange are valued at their liquidation value determined in accordance with rules established in good faith by the Board of Directors of the Company, according to uniform criteria for each type of contract. The value of futures contracts traded on a regulated market or stock exchange is based on the closing or settlement price published by the regulated market or stock exchange which is normally the principal place of negotiation for such contracts. If a futures contract could not be liquidated on the relevant Valuation Day, the criteria for determining the liquidation value of such futures contract be determined by the Board of Directors of the Company may deem fair and reasonable.

c) Income

Dividends are shown net of withholding tax (deducted at source), and are recorded at ex-date. Interest is recorded on an accrual basis.

d) Foreign exchange translation for each sub-fund

Cash at banks, other net assets as well as the market value of the investment portfolio in currencies other than the currency of the sub-fund are translated into the currency of the sub-fund at the exchange rate prevailing at the closing date.

Income and expenses in currencies other than the currency of the sub-fund are translated into the currency of the sub-fund at the exchange rate prevailing at the payment date.

Resulting realised and unrealised foreign exchange gains and losses are included in the statement of operations and changes in net assets.

e) Net realised gains/losses on investments

Realised gains or losses on the sales of securities are calculated on the basis of weighted average cost.

f) Forward foreign exchange contracts

The unrealised gains or losses resulting from outstanding forward foreign exchange contracts, if any, are determined on the basis of the forward rates applicable at the period-end and are recorded in the statement of net assets.

Notes to the financial statements as at December 31, 2020 (continued)

g) Valuation of forward future contracts

The prices of futures admitted to official listing on an official stock exchange or traded on any other organised market are based on the previous day's closing price on the market in question. The prices used are the settlement prices on the futures markets. Futures contracts not admitted to official listing on an official stock exchange or traded on any other organised market are valued at their liquidating value determined pursuant to the policies established in good faith by the Board of Directors of the SICAV, on a basis consistently applied for each different variety of contracts.

h) Accounting of forward future contracts

Unrealised gains or losses of open contracts are disclosed in the statements of net assets. Change in net unrealised appreciation/depreciation on forward futures contracts, and net realised gains or losses on forward futures contracts are disclosed in the statement of operations and changes in net assets. Unrealised gains and/or losses already settled through the receipt/payment of a cash amount are kept as change in net unrealised appreciation/depreciation on forward futures contracts in the statement of operations and other changes in net assets until the termination of the forward futures contract.

i) Valuation of options contracts

The valuation of options contracts is based on the latest price available. Unexpired options contracts are valued at the last price known on the valuation date or closing date and the resulting change in net unrealised appreciation/depreciation and net realised gain/loss are accounted for in the statement of operations and changes in net assets.

j) Payable and receivable

In relation to transactions related both to capital activity (subscriptions and redemptions) and for the purchase or sale of securities on markets where delivery of securities is made against payment of cash, the Depositary may, in its absolute discretion, provide actual settlement. The Depositary reserves the right to reverse at any time any transaction if the relevant transaction has not been settled or if it appears that such transaction will not be settled. The transactions are booked in accounting based on an automated feed from the depositary system. Consequently no payable or receivable are booked on these transactions.

k) Transaction fees

The transaction fees represent the costs incurred by each sub-fund in connection with purchases and sales of investments.

They have been defined as brokerage fees, bank commissions, foreign tax, depositary fees and other transaction fees relating to purchases or sales of transferable securities, money market instruments, derivatives or other eligible assets.

I) Formation expenses

Formation expenses are amortised on a straight line basis over a period of 5 years.

Notes to the financial statements as at December 31, 2020 (continued)

NOTE 3 "TAXE D'ABONNEMENT"

In accordance with Luxembourg legislation currently in force (which, is therefore, subject to any future changes), the Company is not subject to any tax on income, capital gains tax or wealth tax.

The Company's net assets are subject to a subscription tax of 0.05% per annum payable at the end of each calendar quarter and calculated on the basis of the Company's total net assets at the end of the relevant quarter; such tax is reduced to 0.01% per annum in respect of Share Classes comprising institutional investors only (as per article 174 of the Law), as well as in respect of liquidity funds. This tax is not applicable for the portion of the assets of a sub-fund invested in other Luxembourg undertakings for collective investment already subject to "taxe d'abonnement".

At closing date, the total cross sub-funds investment amounted to EUR 7,580,059.96 and therefore the total combined Net Assets at year-end without cross sub-fund investments would amount to EUR 190,554,495.08.

NOTE 15 DILUTION LEVY

Under certain circumstances (for example, large volumes of deals) investment and/or disinvestments costs may have an adverse effect on the Shareholders' interest in the Company. In order to prevent this effect, called "dilution", the Directors have the power to charge a "dilution"

_

Notes to the financial statements as at December 31, 2020 (continued) levy" on the subscription, redemption and/or conversion of shares. If charged, the dilution levy will be paid into the relevant sub-fund and will become part of the relevant sub-fund. The dilution levy for each sub-fund will be calculated by reference to the costs of dealing in the underlying investments of that sub-fund, including any dealing spreads, commission and transfer taxes. The need to charge a dilution levy will depend on the volume of subscriptions, redemptions or conversions. The Directors may charge a discretionary dilution levy on the subscription, redemption and/or conversion of Shares, if in its opinion, the existing Shareholders (for subscriptions) or remaining Shareholders (for redemptions) might otherwise be adversely affected. In particular, the dilution levy may be charged in the following circumstances: 1. where a sub-fund is in constant decline (large volume of redemption requests); on a sub-fund experiencing substantial subscriptions in relation to its size; 2. in the case of "large volumes" of redemptions, subscriptions and/or conversions where 3 "large volumes" refers to net redemptions or subscriptions exceeding 20% of the sub-fund's entire assets; 4. in all other cases where the Directors consider the interests of Shareholders require the application of a dilution levy. In any case the dilution levy shall not exceed 1% of the net asset value per share. The same rate of dilution levy will be applied to all redemption and subscription orders received as of a given Net Asset Value. No dilution levy has been applied during the year as at December 31, 2020 NOTE 16 COLLATERAL ON OTC DERIVATIVES PRODUCTS In the framework of their transactions on OTC derivatives products, the sub-funds of the SICAV may receive cash collateral from the various counterparties with which they deal. As at December 31, 2020 no collateral on OTC derivatives products had been received by the SICAV. **NOTE 17** COVID-19 The Board of Directors of the SICAV acknowledges that the worldwide COVID-19 outbreak is an event during the year as of December 31, 2020. The COVID-19 outbreak and the consequences of all the measures taken in response to the virus by the world community has affected the global economy, the financial markets worldwide and therefore also the asset management industry. There are still a lot of uncertainties in relation to the duration of this outbreak. Although the potential impacts arising from the situation are still difficult to accurately assess, the following key elements should be noted in relation to the SICAV, since the COVID-19 outbreak and until the closing date as at December 31, 2020:

- No specific liquidity risk management measures were triggered, such as: NAV suspension, gating, deferred redemptions.

Notes to the financial statements as at December 31, 2020 (continued)

- The SICAV did not suffer from any significant operational service disruptions. The SICAV has therefore been continuing its usual operations in accordance with its investment strategy and prospectus. The published unaudited sub-funds net assets values and financial information are available on Fundsquare or upon request at the registered office of the SICAV.

NOTE 18 SUBSEQUENT EVENT

No event after the year-end.

Other information to Shareholders (unaudited appendix)

1. REMUNERATION OF THE MEMBERS OF THE MANAGEMENT COMPANY

The Management Company has adopted a Remuneration Policy which is in accordance with the principles established by the law of May 10, 2016, amending the law of December 17, 2010 ("the UCITS Law").

The financial year of the Management Company ends on December 31 of each year.

The table below shows the total amount of the remuneration for the financial year ended as at December 31, 2020, split into fixed and variable remuneration, paid by the Management Company to its staff.

The table has been prepared taking into consideration point 162 of section 14.1 of the ESMA remuneration guidelines relating to the confidentiality and data protection in presenting the remuneration information.

	Number of beneficiaries	Total remuneration (EUR)	Fixed remuneration (EUR)	Variable remuneration (target or discretionary bonuses, parts remuneration) (EUR)
Total remuneration paid by the Management Company during the year 2020	21	18,476	12,711	5,765

Additional explanation :

- The beneficiaries reported are composed of the risk takers (including the 4 Conducting Officers) and the staff of the Management Company dedicated to Management Company activities for all the Funds under management, remunerated by the Management Company. In addition, the Management Company did not remunerate directly the staff of the Investment Manager, but rather ensured that the Investment Manager complies with the Remuneration Policy requirements itself.
- The benefits have been attributed according to criteria such as level of seniority, hierarchic level, or other eligibility criteria, not taking into account performance criteria, and are thus excluded from the fixed or variable remuneration figures provided above.
- Total fixed and variable remuneration disclosed is based on apportionment of Asset Under Management represented by the SICAV.
- The 2020 annual review outcome showed no exception.
- There have been no changes to the adopted remuneration policy since its implementation.

Other information to Shareholders (unaudited appendix) (continued)

2. SECURITIES FINANCING TRANSACTIONS REGULATION ("SFTR")

As at December 31, 2020, the Company is in the scope of the requirements of the Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse. Nevertheless, no corresponding transactions were carried out during the year referring to the financial statements.

3. INFORMATION ON RISK MEASUREMENT

Introduction

There are 3 sub-funds of the Atrium Sicav as of December 31, 2020 that use the VaR approach to monitor the Global Risk Exposure.

The following table (table 1.1) provides the information required as per CSSF circular 11/512.

Other information to Shareholders (unaudited appendix) (continued)

Other information to Shareholders (unaudited appendix) (continued)

General comments

All VaR figures are calculated by taking into consideration the following parameters

- > 1 month holding horizon
- 99% confidence interval (this means that there is a 1% probability that the value of the portfolio could have a monthly decline larger than the percentage displayed) Monte Carlo simulations
- > 3,5 years of data history to determine the risk factors

The treatment and presentation of VaR figures is slightly different depending on the VaR option used (relative or absolute).

1 Relative VaR option

For sub-funds monitored through the Relative VaR approach, the maximum level of VaR cannot breach the limit of 200% of the VaR calculated on benchmark.

The daily VaR observations (from January 1, 2020 till December 31, 2020) for the Octant sub fund have been systematically measured against the VaR observations of the benchmark. The ratio obtained is called the VaR limit utilization ratio.

E.g. March 2, 2020, Atrium Porfolio Sicav - Octant :

Sub Fund VaR	8.96%
Benchmark VaR	9.91%
VaR limit utilization	90.41%.

This ratio should be put into perspective with the maximum limit allowed by the Law, which is 200%.

We present in the table the average, minimum and maximum levels of that VaR limit utilization ratio.

The next two columns present the average VaR levels measured in absolute terms for the sub fund and the benchmark during the same period.

2 Absolute VaR option

For sub funds monitored through the Absolute VaR approach, we present the figures (average, min and max) in absolute terms. In other words they are not measured against any benchmark nor limit. We consider that way of presenting the figures as more relevant and easier to understand.

The leverage level is included as well. It has been calculated as the sum of the notionals of the derivatives used (CESR/10-788 box25). The presented figure is based on daily observations covering the period under review.

3 Sub-funds using the Commitment approach

For the sub-funds using the Commitment approach to monitor the global risk exposure, financial derivatives instruments are converted into their equivalent positions in the underlying assets. The global risk exposure shall not exceed the sub-fund's net asset value.
